### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Specification***

1. The following correction is suggested in the disclosure: in claim 1, line 2, replace the word "which" with "said" or "wherein".

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 8-11 are rejected under 35 U.S.C. 102(b) as anticipated by Motoharu (JP07292943) or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yokoyama.

Motohara teaches an electric floor heating system capable of preventing low-temperature burn, the system comprising an electric floor heating panel 5 and a floor material placed there, wherein the floor material is formed by laminating integrally the upper material 6, a heat diffusion aluminum material 5, and a lower plywood material 4, the total floor thickness is up to 13 mm or less (Abstract and claim 1.

In the alternative, it would be obvious to one having ordinary skill in the art to modify Motoharu's invention to as taught by Yokoyama who teaches an electric floor heating system comprising an electric floor heating panel 20 and a floor material 30-33 placed

thereon, wherein the floor material has a thickness of 10.3 mm and is formed by laminating integrally an upper material 30 having a thickness of about 3.00 mm, and a heat diffusing material 22 having a thickness 1.5 mm.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5, 7-8 and 12-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Motohara in view of Yokoyama and further in view of Seki et al. Motohara in view of Yokoyama discloses substantially the claimed invention, but does not disclose a foldable heating panel and boards connected by belts. Seki teaches a foldable floor heating panel 10 composed from at least 3 heating boards<sup>11</sup>. It would have been obvious to one having ordinary skill in the art to modify the invention of Motohara in view of Yokoyama to include a foldable floor heating panel as taught by Seki to ease a floor heating system installation and provide belts through the holes as a design choice, because Applicant has not disclosed that these belts provide an advantage or solve a stated problem.

***Allowable Subject Matter***

6. Claims 6 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
